Canvas Eureka

Accelerate Data Modernization Journey to GCP Smart Analytics Solutions

Canvas Eureka Overview

Data modernization is a critical aspect of digital transformation initiatives that organizations are embarking upon. Today, more than ever, organizations are producing and consuming diverse datasets and data volumes at a rate that current legacy data warehouse and on-prem systems simply cannot scale fast enough.

In this context, organizations are migrating to GCP smart analytics solutions that are not only serverless with overall lower TCO but also to take advantage of cloud-native services, real-time analytics, and AI/ML innovations to deliver more value to the business. Migration of existing solutions is a significant activity before adopting cloud-native data solutions and activating new use cases.

However, migrating

1

**The legacy data warehouse
with proprietary extensions
and with accumulated tech
debt over decades**

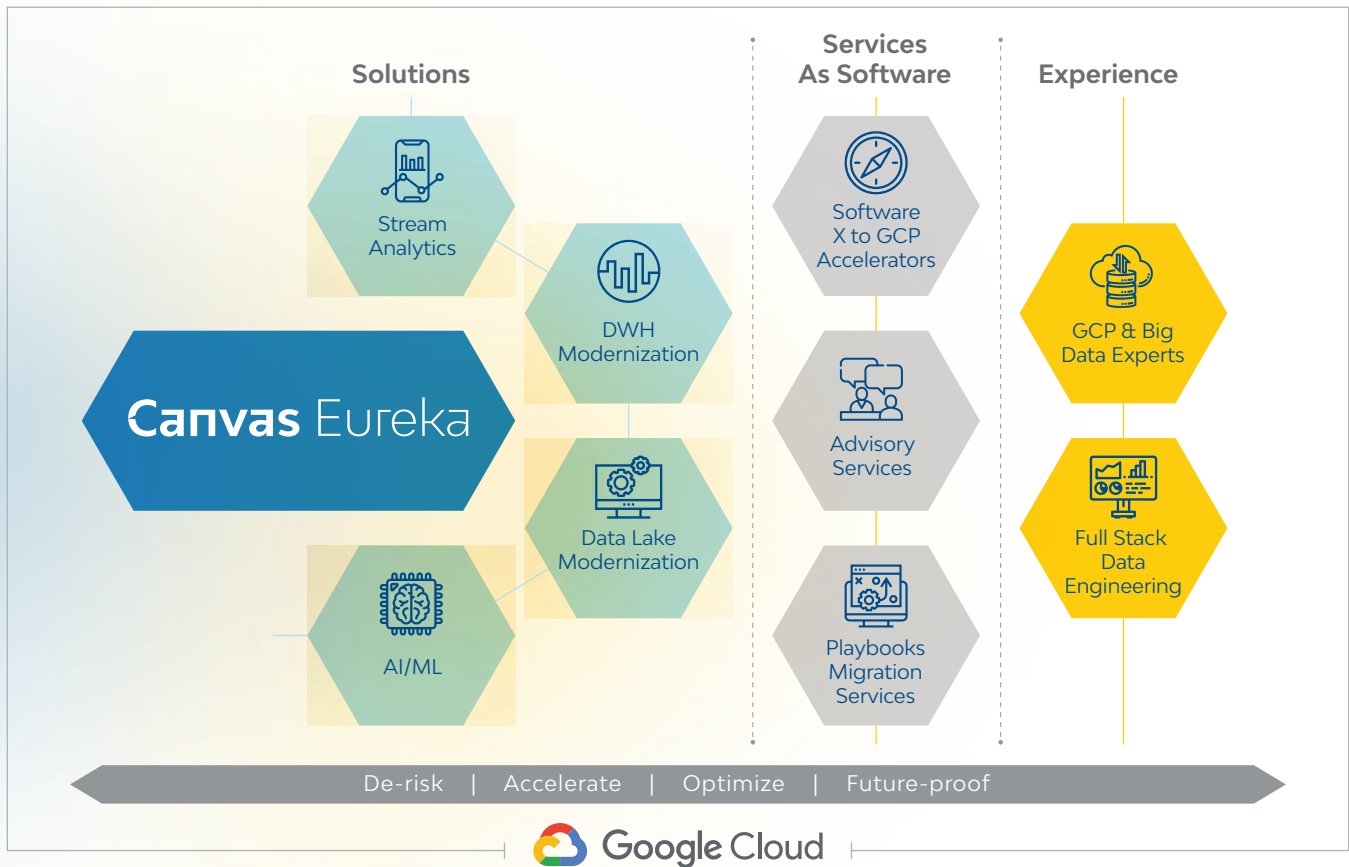

2

**The Hadoop-based data lakes
with inconsistent and poor data
quality, complex data pipelines,
and a multitude of technologies**

can be complex and challenging leading to delays, high costs, and failures.

Canvas Eureka

Canvas Eureka addresses the core challenges of migrating legacy data solutions to GCP smart analytics solutions, making your data transformation journey timely, predictable, cost-effective while de-risking and easing the transition path.

Advice

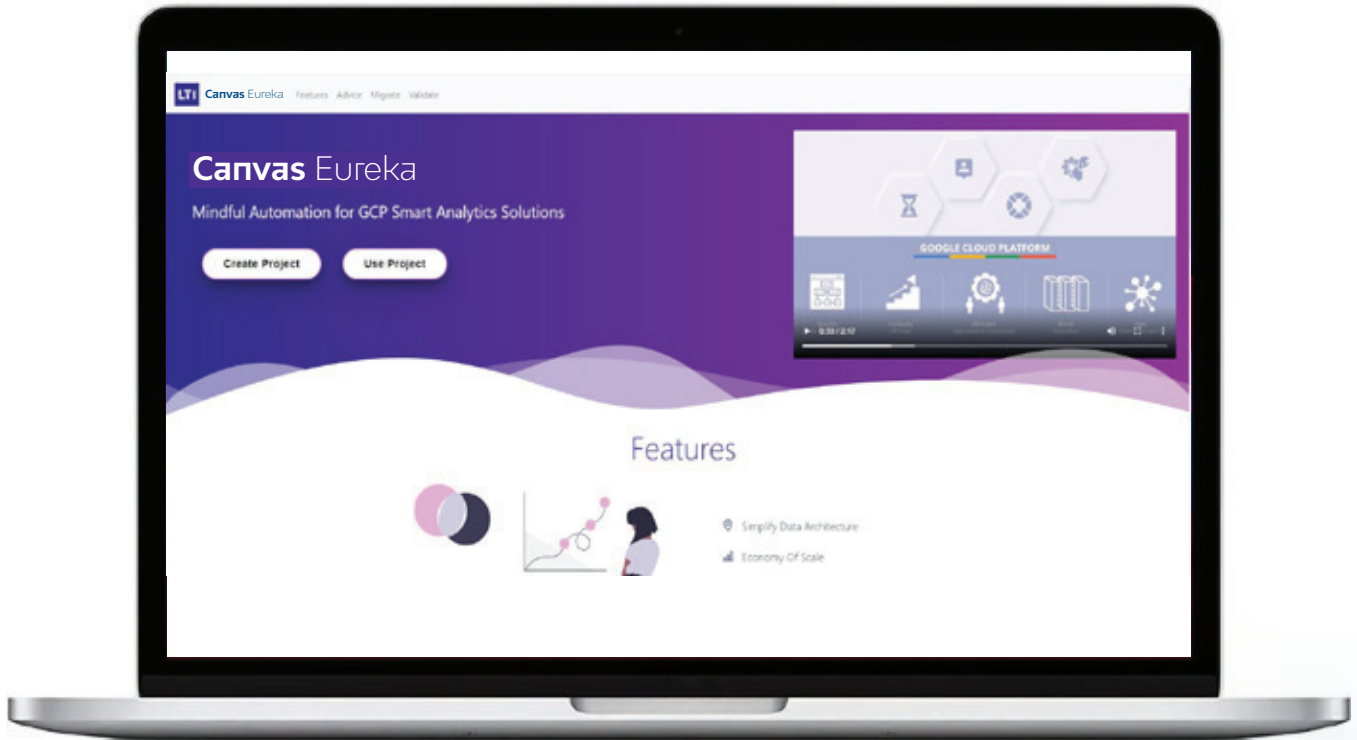

- ☑ Business Case
- ☑ TCO Calculation
- ☑ Solution Selection
- ☑ Target Architecture
- ☑ Execution Strategy

Canvas Eureka ADVICE

Our 3-step technology and consulting framework for data modernization with GCP smart analytics solutions. Our consultants will work with you to understand the business vision, current data, infrastructure, architecture and process landscape by having workshops and interviews with executive stakeholders, business, and technical SMEs to develop a data modernization strategy customized and aligned with your organization’s strategy, vision and business goals.

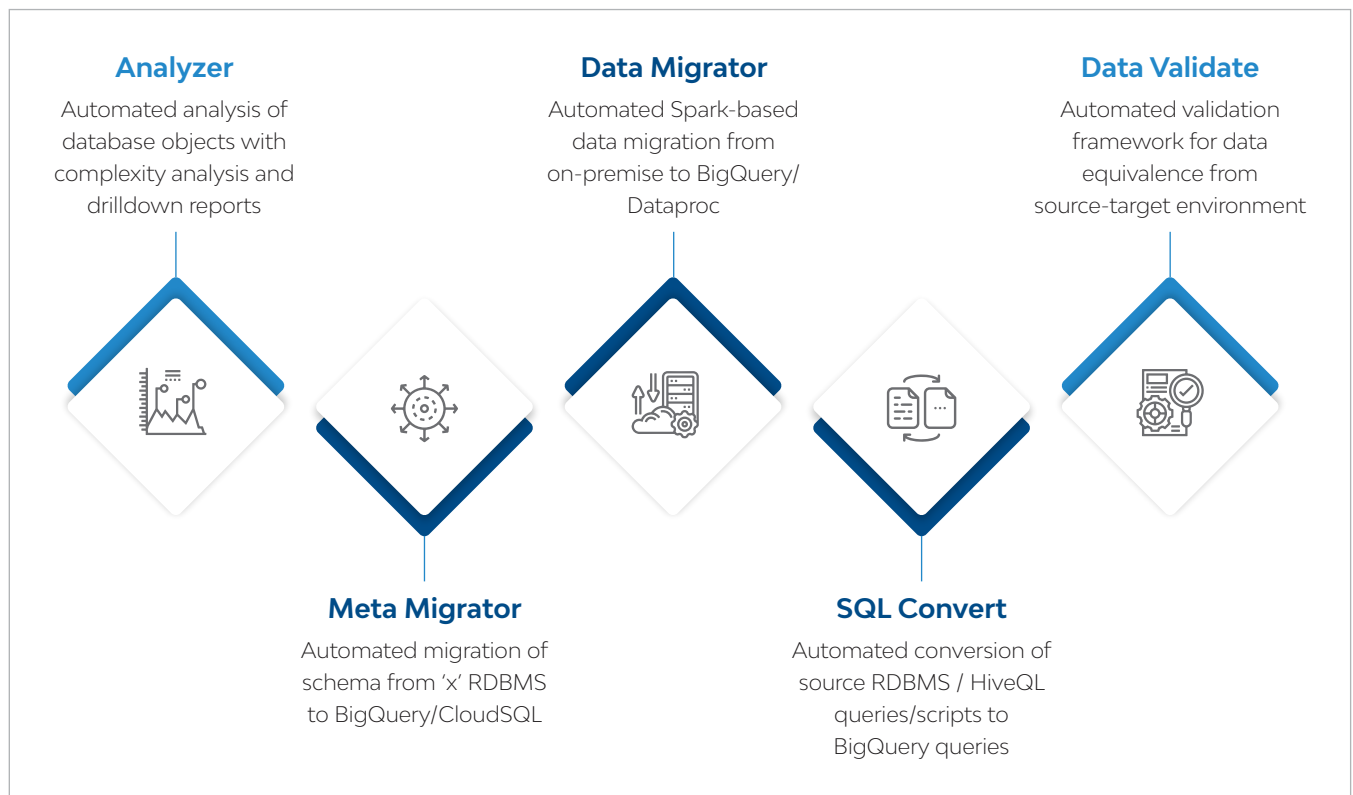

Value

De-risk migration path to GCP smart analytics solution by codifying answers to questions such as

- 1 | How complex would be modernization journey for our current use cases?
- 2 | What would be the cost of migration?
- 3 | What would be the optimum approach for migration by LOBs, sources, or downstream systems?
- 4 | How much time & effort required for completing migration?
- 5 | What are the risks to the migration based on our current environment?

Canvas Eureka MIGRATE

Our mindful automation toolkit for migration from a legacy data warehouse and Hadoop solutions to BigQuery/Dataproc smart analytics solutions.

Value

De-risk migration path to GCP smart analytics solution by codifying answers to questions such as

- 1 | Accelerate time-to-value.
- 2 | Automation to improve accuracy and reduce manual processes.
- 3 | Reduce complexity and de-risk migration.
- 4 | Reduce time for data reconciliation and improve data accuracy.
- 5 | Metadata migration from weeks to hours.

LTIMindtree is a global technology consulting and digital solutions company that enables enterprises across industries to reimagine business models, accelerate innovation, and maximize growth by harnessing digital technologies. As a digital transformation partner to more than 700+ clients, LTIMindtree brings extensive domain and technology expertise to help drive superior competitive differentiation, customer experiences, and business outcomes in a converging world.
