

Case Study

Retail Analytics Platform for Leading Provider of Transport Solutions

Client

Our client is a world-leading provider of transport solutions, including trucks and buses for heavy transport applications combined with an extensive product-related service offering.

Business Challenges

The client wanted to

- ▶ Identify the exact time that the vehicles enter and leave the workshop boundaries (Geofence).
- ▶ Verify if the time that the work order was opened matches the time that the vehicle enters and leaves the workshop.
- ▶ Increase accuracy on vehicles' downtime in order to avoid fees issued to the client due to downtime agreements not being met.

LTIMindtree Solution

- ▶ Created Snowpipe to process streaming data from vehicles.
- ▶ Used vehicle geolocation and validated the stops inside the workshop.
- ▶ Used Snowflake stream, task, and procedure, to track vehicle movements.

Business Benefits

200K stops
processed daily
for Brazil.

Zero
defects or
error.
